Naggum Software

Naggum Software has since its inception in 1985 provided consulting and programming services in the area of computer networking and data interchange in broad terms, with heavy involvement in standards development (mainly electronic documents (from e-mail to SGML) and character sets). Publishes technical reports and standards notebooks. Mr. Naggum's current personal projects include: edit history management in evolving/living documents; common (Unix-type) manual pages; distributed hypertext over the Internet, including experiments with USENET news.

The FSU Center for Music Research has been working to create a standard music representation language since 1980, and it was involved in the SMDL and HyTime projects from their earliest beginnings. The CMR is working to implement the Standard Music Description Language for creative, instructional, and research purposes.

Naggum Software has since its inception in 1985 provided consulting and programming services in the area of computer networking and data interchange in broad terms, with heavy involvement in standards development (mainly electronic documents (from e-mail to SGML) and character sets). Publishes technical reports and standards notebooks. Mr. Naggum's current personal projects include: edit history management in evolving/living documents; common (Unix-type) manual pages; distributed hypertext over the Internet, including experiments with USENET news.
